

BOARDING EYE

INFORMATION IS EVERYTHING

REPORT MENU

- Customized Report Creation
- Machines Efficiency Comparison Report
- Production Report For Specific Dates
- Defection Stops Report
- Production Report Per Machine

The interface displays a grid of machine status reports for various models: SOCKMAGIC-1 (FAULT), SOCKMAGIC-2 (RUNNING), SOCKMAGIC-3 (RUNNING), SOCKMAGIC-4 (RUNNING), SOCKMODULE-6 (RUNNING), and SOCKTEAM HS-5 (RUNNING). Each report includes a color-coded status bar, a small schematic diagram, and a table of performance metrics such as Total Production, Defection, and Machine Downtime.

Below the grid is the **BOARDING EYE** dashboard, which features a 'Total Production' counter (00,300,000), a 'Total Defection' counter (150), and a 'Reports' section with a grid of machine-specific data panels. Each panel shows a small schematic and a table of metrics for a specific machine.

SOCKS FINISHING

www.heliactinternational.com

- * Realtime efficiency tracking of boarding sections,
- * Wide database for entire data in boarding sections,
- * Anytime several report filtering facilities from database,
- * Total production information per shift, per day, per week or for any time period,
- * Production information per operator per selected time period,
- * Total idle time information for each machine,
- * Comparison report for operators or machines,
- * Reducing the cost by reducing the lost times,
- * Continuous detection for operators and machines,
- * Preventing of any mistakes and lost by BOARDING EYE...
